Education

New Jersey Institute of Technology, Newark, New Jersey, United States

Bachelor of Science in Information Technology

January 2016 - present

    Specialization: Web Applications

Skills

Scripting Languages: HTML, CSS, JavaScript, PHP
Technologies: Git, Laravel, Bootstrap, AngularJS, UIkit, WordPress, Beans WP Framework
Database Administration: MySQL
Systems Administration: Windows 10, Linux (CentOs), Ubuntu

Projects & Coursework

Stock Market Simulator Web App (Group Project)

- Developed an app that used the Barchart API to retrieve stock market information. It allows a user to create a portfolio by buying and selling shares with fake money based on real prices and historical data, and view news related to the portfolio.

Spring 2019

JavaScript To-do List App (Personal Project)

- Created a to-do list app from a tutorial. Used the localStorage property.

April 2019

Supercars SA (Personal Project)

- Developed a website for an Instagram supercar fan page that I help manage.

March 2019

Advanced Web Applications

- Worked with the backend team on an FAQ Bot group project using Laravel and maintained with Git.
- Created endpoints, unit tests, migrations, models and controllers.

Fall 2018

Advanced Website Development

- Projects incorporated frontend web technologies such as Bootstrap, JavaScript/jQuery and AngularJS.

Spring 2018

Experience

Red Earth Web Design – Pietermaritzburg, South Africa

- **Position:** Web Developer Intern
- **Description:** Used UIkit, the CSS framework, to develop layouts and convert existing designs into web pages as well as implement them onto a WordPress site by customizing the theme template using a framework called Beans.

June 2019 – August 2019

New Jersey Institute of Technology – Media Technology Support Services

- **Position:** Delivery Technician
- **Description:** Delivery and setup of classroom and special events audio-visual technology, including smart cart mobile computing stations, projectors and public address systems.

October 2018 - present
